GOVERNOR I. M. BARE UNCOVERS: GIGANTIC MSM SCANDAL

Dr. K. Moulder Named New Dean in Shake-up of Staff Parking Ticket Given Manure Spreader Starts Campus Investigation Roulette, Floating Crap Games, and Betting on Grade Points Among Many Things Revealed

Governor W. Jim Bear, fiery defender of the people, early this morning announced to the press that a gigantic scandal has been uncovered at the Missouri School of Mines and Metallurgy. Not only did the good governor find gross misappropriations of funds, falsification of records, income tax evasion, and other vicious crimes, but to the horror of the administration, several republicans were found lurking about in this fair institution.

The new dean of the college will be a rather shy, prudent soul, well loved by all (snicker), Karl M. Moulder. Dean Moulder, shocked at first by the announcement, observed shortly thereafter that it "was about time someone else cashed in on the boullion shipment from Columbia."

The investigation began as a complaint sent from a certain Mr. S. Patrick, who interviews students from M. S. M. for the A. A. (Amalgamated Asymptotes). He reported that his vehicle, a 1907 4-speed manure spreader, had

been tagged by the campus Gestapo and had been severely fined. The state officials thinking it just another crank letter were surprised when the whole gory picture came to light.

A mob of strong-arm boys employed by "Grinnin' Gevvy" an ex-con who sitteth at the left hand of Curtis, sneak about the campus armed with bundles of little pink tags and fix them to any vehicle not properly registered with the commissar of vehicles. Tt the terrorized students this summary meant hours of torturous brain-washing even to the point of complete breakdown. Punishments were swift and cruel — they thought nothing of informing local tavern owners of the offender's age or confiscating the poor chap's crib sheet.

From the new school office over a certain local bowling alley, the new dean, "Mouldy," has already set up a committee to investigate a committee investigating campus parking facilities. It is obvious he will be qutie efficient in his job.

Since much of the income of the school is milked from the students, during the investigation a very clever trick was uncovered by the chief investigator, Mox Nix. It was discovered that in one of the back offices a floating crap game was being run by the registrar. Pastebord Paul's den of vice is quite the place, complete with roulette and an intricate system of magnets. His hat-check girls in the front office allow only the "big money" into the gaming room. A complicated system of betting exists, where the student wagers one grade point to "Pasty's" minus two, with loaded dice.

Way down in the cellar of the Administration Building one of the syndicate's shrewdest and most persuasive mobsters keeps the books. "Klinker the Cat," a two-time loser in extortion, has been equipped with the most modern devices of persuasion: thumb-screws, iron maidens, etc.

Freshmen entering the school are lured down into this cave by seductive young ladies who smile

and explain how hard it is to get a room hereabouts, and if they'll just sit here a minute Klinker will personally speak with them. The next thing the poor fellow knows, he's rented the broom closet on the third floor of Altman Hall. Any protest, of course, means the pincers and rack.

The brains behind the outfit is a kindly old codger who lives in a rejected Walt Disney prop at the south side of the campus. Seldom seen by the average student, those who have met him will never forget his cheerful greeting: "OK, Buster, let's move it, uh-h?" His connection with hte ring was difficult to discover as his important connections at Columbia have kept the "bulls" away for many a moon. His career on the road to crime began early when, as a youth, he refused to believe in the Easter Bunny and St. Pat. During his wild flaming college years he sold French postcards to Frenchmen, which is reasonable. This was used as a front to strong-arm his way into the engineering

racket by selling bootleg watches on whose faces were engraved the 347½ formulas in Chapter 26 of Sears and Zemansky. He received four years at hard labor for that trick.

A few months after graduation he took over the position as dean and within minutes the syndicate was formed.

The new dean, oozing over the side of his bar stool, blocked out his new administration's policy:

- 1). No more Saturday classes. Saturday shall be reserved for hangovers.
- 2). No more 7:30 classes. 7:30 classes are reserved for hangovers.
- 3). No afternoon classes. Afternoon classes are reserved for creating hangovers.
- 4). Lunch (liquid) shall be from 8:30 to 12 noon.

The good Mr. Moulder is a learned man, having taken his degree in "Importance of Scenery in Shakespeare's Cymbeline," with a minor in the art of brewing.

Expounding upon his new pol-

Staff Shake-up Befalls MSM's ROTC Department

Bird Colonel Hurlbert Z. Rathskelter, noted German military leader, today announced over Radio Krautland that his Socialite Army will lend to the MSM ROTC Department its famous SS alumnus, Peter Ja Spitski.

Mr. Spitski, as learned from in-

Battalion S-19.

Mr. Spitski, known as Slobberlips for short, will introduce several new courses into this now simple-minded curriculum. Such basic courses are being considered as eye-gouging in two steps, Gestapo methods I, II, III and IV, beer analysis, and how to say "You all" with a mouth full of kraut. For advanced military guns and their cousins, the PR's, several more elite courses will be taught — barn-burning, counting dandelion leaves, underwater mud-crawling, among others.

Mr. Spitski, hereafter to be known as His Lordship, has planned the following shake-up in the gung-ho department:

Captain Hermann—He has been given two alternatives—Either march to the sea or be put out to pasture in Mississippi.

Major Huller—To take his liquid testing machine and play with it.

Captain Nedsger—Will now take over the firing range since he's such a hot-hot.

Major Salton—To teach in WAC Corps, auxiliary to local WC-TU.

Captain Heightly—To carry on ni his usual contradictory manner, saying one thing and doing another.

Major Weagan—Send to Summer Camp. Demonstrate the tranquility and peace of Fort Leonard Wood with his famed Irish patience and lack of temper when handling his subordinates.

Seargent Mess—"That Limey's gotta go!"

A special commission made up of Seargents Goeth, Tradbury and Avans will investigate the also-

175-Foot-Long Bar Featured On First Floor of Elaborate Student Union Structure

Our Hallowed Halls of Ivy will soon gain an addition. The whole campus will welcome our new student union building, which will give usone of the most beautiful college campuses in the nation. It is reported (straight from the registrars office) that the new building has increased the enrollment of women ot an all time high. Registrar Ponder is considering giving I. Q. tests to all incoming coeds in order to make sure that they are suited for an engineering curriculum. He said that he wanted to weed out any girl who might be coming to MSM just to take advantage of the recreation facilities of the new Student Union.

The new building will be styled after the new, low, flashing lines of the Rolla Building. The architect, Frank Lloyd "Wrong" Schmaltz, who is noted for his underwater bridge over the River Kwai, said that this was his crowning achievement. The design features tall, slim, marble columns rising in front of sandstorm tan brick walls. The front of the building will be covered with 47,923 square feet of translucent window glass. Rank Floyd says that the main purpose of this is to make the students outside wonder what is on the inside. Once inside the building the student will find it hard to fight the crowd trying to get inside. So he will immediately start using his \$5.00 a semester share of the recreation facilities. This way none of the facilities will be wasted. Also as more people get inside and none go out, fewer people will go to class and this will take care of our crowded class

room situation.

The three story colossus will have a swimming pool in the basement. The pool will be shaped like a big shaft, 14' wide and 100' long. The purpose of this shape is to remind all Miners of the classes they may be cutting. For the convience of the coed populace, the pool will be divided by a wire screen suspended directly down the middle.

The first floor will house the new campus book store. This new start will be a non-profit organization offering the same low prices on school supplies that are offered

now. Next to this store will be a Pawn Shop so that all Miners can have a place to check in all the books they will need for the day's classes. This will be a way to save time formerly wasted in going home between classes.

The main attraction on the first floor will be the bar and grill. The grill is a small piece of perforated metal found in the east corner of every room. It is the opening vent to the furnace and heating system. the BAR will be two and one half feet wide and approximately 175 feet long. It will be shaped in the

THE MISSOURI MINER

THE MISSOURI MINER is the official publication of the students of the Missouri School of Mines and Metallurgy. It is published at Rolla, Mo., every Friday during the school year. Entered as second class matter February 8, 1945, at the Post Office at Rolla, Mo., under the Act of March 3, 1879.

The subscription is \$1.00 per semester. This Missouri Miner features activities of the Students and Faculty of M.S.M.

Lowdown on Traffic Board

There is much that can be said about our committee for the improvement of traffic safety, but unfortunately little that can be printed. Let us start this friendly discussion of our idols with a short description of the dolts who make up this committee.

First, is R. H. (Red Hot) Cur. This human pillbox is nothing but a walking pharmacy. He (?) takes out his sadistic views of the human race (brought about by an early frustration) on the members of the student body who are unfortunate enough to park their cars, bicycles, or scooters on a campus lot, also on any pigeons, rabbits, dogs, or foxes which pause on these areas. Warning: do not stop to light a reefer on these hallowed grounds as it may well cost you a weeks beer money.

Then there is old J. M. "Plato" Brewski, who is a refugee from the deep dank coal pits of southern Illinois. He became a refugee when he was chased out by the Shelton gang. He wrote the brilliant essay which is printed on the school's parking permits.

Also we have C. R. "45 cal." Remington. This case is a formed Miner, who after years of brainwashing by the faculty sold his birthright and joined those foes of democracy who inhabit Porker Hole.

Last, but not least, certainly not least, is Peon Herskerfz. This fellow, known as "Skippers little boy", is often seen motoring down Pine street in his big bad Oldsmobile, which he drives like a 48 ton Sherman tank. He continually lifts his alpine hat to show his curly locks. In addition to his fame as a staunch supporter of higher traffic fines, he is also known as the only prof on campus who attends class to gain knowledge from his students. He tests over the students comprehension of the tall tales he tells in

class. He is well qualified for his position as he has many loyal years of service with the state highway department as a maintenance man.

This wierd collection of schizophrenics resemble nothing more than a list of characters from a Shakesperian tragedy. My spy on the committee says that their meetings are run by a strict and secret procedure. Here, for the first time in print, is the daring expose of this group.

Members are admitted only by password which is "Double All Fines." They then sing their anthem which in part is:

A sticker for the gas cap,
A sticker for the mirror,
A big one on the bumper,
And another permit here.
We'll put another decal,
On the windshield here,
If he can see thru all this junk,
It won't be very clear.

After the anthem they practice covering windshields with stickers.

This brings us to the business section of the meeting.

First, 45 cal. gets up and says that the aging eyes of the Rollo

Innocent Miners Victims of Unjust Co-Ed Raid on Corms

The Corm Douncil is presently seeking the advice of the local police and school authorities to prevent the many, volumptuous college girls in and around the Rolla area from constantly raiding their hallowed halls. "These 'short raids' must stop or drastic measures will be taken", remarked a freshman from NacAmerny Hall. "They entered in the wee hours of the morning the other night, and stole my best pair my

gestapo are getting used to red student stickers, white ones should be issued to make the students easier to recognize. These stickers are to be financed with part of the kickback from the Rolly SS troops. They are to be placed on the rear window at the focal point of the rear view mirror. Their they will have the added function of making it impossible to see the NKVD man following you.

Then Stewer proposes a new mode of punishing pigeons who land on the "Where's your permit" sign. As the pigeon population of Rolla has little currency left, it was decided to adopt the old Arabian punishment of amputating their feet.

The final business of the evening was deciding what to do with the weeks income from fines and parking ticket manufacturers. After a 13 second discussion it was decided to give it to a worthy charity, namely themselves. They also gave one dollar to the Campus flea chaser for surpassing his parking ticket quota for the 93rd straight week.

The meeting was closed by paying homage to the golden bust of Silas Marner, their gone leader.

My camouflaged spy, he was disguised as an inkwell, states that the only unusual event of the evening was the addition of an acid injector to their own inimitable version of the MSM shaft.

In conclusion, we have one question to ask the committee: Does the traffic safety committee have any function except to fatten the bankrolls and backsides of its members?

mama gave to me. They were purple with yellow and green elephants dancing on them. Now I can't sleep right anymore."

One intelligent looking, bespeckled youth of our modern generation, commented, "These constant interruptions take away from my precious study time and I must keep a three-point-five or pater won't let me have my cad-dy convertible anymore."

Vern got so many complaints he had his phone disconnected and

a tie!", remarked a non-conformist to the truly idealistic approach of the Cormenites, a member of Mu Delta Delta fame (Makka DAMMEA DAYYA).

This is one of the biggest problems on campus. What is to be done about it?

Water was tried, but the bathing suit clad agitators of romdy escapades merely laughed at the defenders of the Corm. When trapped four of these hardened villains admitted the reason behind

Pictured above are four members of a short raid on MSM's boys' corms. These Rolla co-eds entered the corms in the wee hours of the morning; whence, the boys were rudely distracted from their studies.

doubled the volume capacity on his colored-TV set. He's so nervous he used his kikapoo joy juice for cough medicine and couldn't fine his bed.

The Corm boys feel just a little funny about chasing girls out of their ownrooms! This fact alone distinguishes Cormenites from real people. Who else in Rollo would chase real, live, college women from his own room? "They could steal my whole? ;\$\$()3XZYS1 wardrobe for all I care. I'd put up such a fight any ref would call it

this turnabout. They felt left out of the "true college picture of modern days." Since the menfold wouldn't oblige by staging the reverse action, they took the initiative themselves!

This town will never be the same. Nothing has happened in this burg as big as this, since Christopher Rollamus stepped off the Eastern Connestoga Special in our dear beloved district and was pantsed by the Indians. He never did quite regain his exploratory poise.

Special Report . . . UGLY MAN CONTEST

As this issue goes to press the counting of the ballots for the UGLY MAN CONTEST is still incomplete. A strange last minute write-in candidate, however, has gained a popularity that will unquestionably place him near the top.

It is the general opinion of the students that at last the ideal ugly man has been fully realized in the person of the "Dark Horse" candidate, Curtis L. Wilson.

sits on the curb and lets his feet dangle.

It is evident at the first glance that Curtis L. Wilson comes from a long line of aristocrats. As a matter of fact, it was a direct ancestor of Mr. Wilson's who modeled for the Egyptian pyramids.

Mr. Wilson first realized that he was out of the ordinary when his home town newspaper printed his picture on the front page for having won first prize in a contest for catching the most number of fish at an Easter egg hunt. When the first issue of the paper appeared the editor was flooded with calls asking why the paper published on the front page a picture of Orphan Annie with bloodshot eyes.

This was the beginning of rapid progress to infamy for Mr. Wilson who is now up against the stiffest competition of his life. Will he be victorious? Only time will tell. Like the time of the next MINER for instance.

(See Next Column)

THE WINNER

LARRY COLONNA

he's Dean!! NO, I mean he's Theta Kappa Poo's Ugly . . . Oops (snicker) Theta Kappa Phi's Ugly Man Contest representative. (Psst, sponsored by Theta Kap, darn it, Theta Tau). He won?? I mean, he WON!

Larry (I'm serious now) swept the field with 630.3 votes while "Hawk" Hartman of Sig Ep came in a close (??) second, with 443 votes, yelling, "check that decimal point." Bill Henning, Sig Nu, was third with 221.4 votes and he blames the whole thing on that —lazy dog that he had to drag around. Louis Whitehair, Engin Club, was fourth with 210 votes and Alan McHugh, Sig Tau, fifth with 192.1. All of the candidates except Larry agree the Ugliest Man won.

All told, \$245.47 was collected for the March of Dimes. Theta Tau wishes to thank all the men who donated their time and TALENTS, and also those who donated (!!) in making this a successful contribution to the March of Dimes.

A woman never stands if there is a place to sit.

SHAKE-UP

(Continued from Page 1)

icy "Cuddles" observing while squinting through his beer glass:

"Marry, sir, here's a sore spot. Something is rotten in Rolla.

To drink: perchance to burp; ay there's the rub;

For in that sleep of besottedness what dreams may come when we have shook up the Budweiser.

Must give us pause." (He leaves for the men's room quoting MacBeth.)

"At the south entry, retire we to our chamber:

A little water clears us of this deed: How easy it is, then."

It is of little doubt that the honest efforts of Dean Moulder shall raise us from one of the best schools in the country to that of one of the most liberal. This Miner would like to congratulate our new dean. We must ask of the student body as a whole to refrain from throwing lit matches at his as has been the past policy.

Typical ugly man poster that has appeared in town and on campus.

Why have the multitudes given their overwhelming support to Mr. Wilson (known by his intimate acquaintances as Cyclops Wilson)? This question we cannot fully answer now but perhaps the key to it lies in the comments which have so graciously been deposited with the votes or mailed directly to the MINER. From Columbia, Mo., a Mr. E. Ellis writes, "Ugh! Cyclops Wilson gets my vote; he's worth ten cents." And from right here in Rolla, V. Gevecker says, "By golly that Wilson is a horse!" Mr. Wilson's favorite letter comes from the forty-ninth state, where S. Kammow says, "Igloo-head Wilson will be the top man on my totem pole."

Mr. Wilson's appearance, for the benefit of those who have never seen him, is not startling, but rather conducive to contemplation and particularly horridification. His hard features appear as if they were hewn from the rock (with an air hammer). His high, ignorant type forehead and closely set criminal eyes are in sharp contrast to his generally lanky build which is shown ideally when he

Note to a columnist who confessed a small mistake called to his attention by a reader: "Has it ever occurred to you, John, that nobody reads what you write, except those whose specialty is mistakes?"

When a lady precedes a man through a swinging door and lets it slap him in the face, but thereupon apologizes, you can safely put her down as most unusual—perhaps one in a thousand.

They said it couldn't
be done...
They said nobody
could do it...

Rolla, Mo. to Be Site of 1960 Olympics

Dean Wilson has announced that he has persuaded Mr. Wagner J. J. Wagner, chairman of the 1960 Olympic Planning Committee, to hold both the winter and summer games here on the campus of MSM. To accommodate this world-wide sports contest several MINOR changes will be made around the town of Rolla. The Administration hopes to get the students' aid (small bombs and large ones) in the remodeling of some parts of the campus and town.

Below is the list of sports events that will take place at the Olympics during and after our summer and winter sessions. Along with each event is also listed the changes in the campus or the town that will be made to accommodate the events.

1. Track—The Jackling Gym removed and all married students apartments destroyed. The track will be enlarged to an oval with a 25-mile long straightaway to give

the runners a chance to show their stuff.

2. Swimming—Frisco pond is to be drained and enlarged to a 500yd. x 1.5 yd. pool with 33 1/2 swimming lanes. To illustrate its huge size, the 200 yd. medley requires 45 laps. The diving board will be made out of a new plastic which guarantees each contestant of a trip to the moon with a double bounce on the board.

3. Rowing—The Mississippi River is to be diverted down highway 66 to Rolla to provide ample room for rowboats, speedboats, steamships, and houseboats.

4. Canoeing—Being as the current of the Mississippi is too fast, the Missouri will be brought to Rolla on highway 63.

5. Gymnastics—A new gym with a seating capacity of 275,000 children will be built on the present site of Triangle, PiKA, Acacia and the Dorms. To economize, the bricks and debris from these buildings will be used to

hold the Missouri and the Mississippi until the local Army Engineers can decide what to do with the rivers after they get here.

6. Fencing—The entire town of Rolla will have to be fenced in with an estimated 5 million wooden-picket fence.

7. Riding—A bridge path will be constructed this summer through the heart of the business district, making necessary the destruction of all buildings from the Uptown to the railroad tracks on Pine, and all between Pine and Main streets.

8. Cycling—To conserve on space, buildings on the MSM campus will not be torn down. However, to provide for the winter sports which will be held in July, the junk from any of the many improvement projects will be dumped on the campus in hopes of covering all existing buildings to enable the installation of a ski jump.

9. Baseball and Basketball—12 outdoor courts (evenly divided),

each with a seating capacity of 3 will be constructed south of the golf course overlooking the Mississippi.

10. Soccer and Hockey—13 additional fields overlooking the Missouri from Soest road will be provided.

11. All other sports will either be canceled or forgotten about.

Now available at the ticket office is a season pass to the Winter Olympics, July 1-3, price \$17.50, and a season pass to the summer events, Dec. 1 to Jan. 1, 14c.

If this article has not made clear the exact time schedule or has said anything you don't understand, please feel free to call on any member of the faculty and you will be assisted (out the door).

Other buildings to be destroyed or modified:

ME—da
Mining—dv
Chem and Math—D
Rolla and Norwood—f

Fulton—p
Harris to be enlarged to a rest-room and powder facilities (accommodate 30,000).

Code—da—destroyed
dv—destroyed
D—destroyed

p—destroyed

As you can see here has been a complete plan made for this historical event to be held here at Rolla.

NOTICE

The University Dames' regular meeting will be held April 9th at 8:00 in Parker Hall Auditorium.

Dr. E. E. Feind will be the guest speaker. He will explain several uses of hypnotism in medicine.

The officers for the coming year will be elected at this meeting.

Tickets for the Graduation Banquet in May may be purchased for \$2.25.

Bear Joins Faculty as MSM Drinking Coach

CAY BULLMAN SELECTED AS STUDENT MANAGER

It is now that time of year that all sport enthusiasts dread. The basketball season is now dead, and baseball season is still several weeks away. As you can well see, there is an enormous gap to be filled, and until that gap is plugged life here in Sin City was confined to listening to the latest Chipmunk records, building concrete block barricades across streets, and occasional panty raids on Acacia.

But, however, the situation has been completely reversed due to the foresight, wisdom, and open-mindedness of our esteemed faculty and Board of Curators. The faculty has seen fit to form the M. S. M. Intercollegiate Drinking Team to round out M. S. M.'s sports program.

In keeping with M. S. M.'s athletic traditions, the faculty set out to find a high caliber coach for the drinking crew. Such a man was found right here in Sin City in the person of "Bear." Bear is well qualified to lead our slop-chute men as he has had long experience with Miner elbow-benders in addition to his M. A. in Intoxicology from Salem U.

The choice of faculty adviser fell to rollicking Prof. Barr of economics fame. Unbeknownst to many Miners, behind that said front of stolid dignity is a man of extraordinary drinking prowess. Prof. Barr learned his economics early as he was notorious for cutting bath tub gin with rubbing alcohol in his prohibition bootlegging days. Mr. Barr is the

well known author of several books: "Barr's Beer Games" and "Chug-a-Lugging Made Easy." With such a background this man should be able to give splendid faculty support.

Tryouts for the Miner Drinking Team will begin sometime next week at Bear's bistro. The school expects a large turnout for the team tryouts for various reasons. School-supplied beer might be the hero jacket given to all drink-considered one inducement, another is team lettermen. This jacket is suitably adorned with a foaming beer mug. Senior lettermen also receive lifetime passes to all M. S. M. drinking bouts.

As of yet, Bear doesn't have a schedule worked out, and is finding some difficulty scheduling Harvard and some other Ivy League colleges, but was turned down cold because they found that Bear doesn't sterilize his beer glasses and the eastern phonics feared catching some Rolla bacteria.

Because of the slight she received in not being permitted to enter the Intramural Wrestling Program, Miss Cay Bullman has been selected as the Student Manager of the Drinking Team and will undoubtedly serve honorably.

All in all, the Miner Drinking season ahead should prove to be a rousing success of the quality and quantity of Miner drinkers. With any luck at all the Miners should go undefeated in the coming season.

INTRAMURAL Sports

With the volleyball season coming fast to a close it is time to start preparing for the annual intramural chariot races. This year's races, which are expected to be the best yet since their origin here at MSM in 1936 B. C., will be held since April 31. A change in the location of the race will go into effect this year. Instead of holding the competition on the golf course, as has been the custom the past few years, it will start on Pine street and proceed to Ramey's. This change was put in to draw a larger number of entries. The type of chariot, which is to be used in this race, is the "biga," a two-horse-drawn chariot built especially for rugged terrain. Horses, as usual, will be supplied by the independents.

In last year's competition, TKE took first place honors by defeating Kappa Sig in the last twenty feet of the golf course track, as one of Kappa Sig's horses stepped in the number nine hole. Lambda Chi came in third when the Theta Kappa Phi crew was swallowed up by quicksand on the number six hole green. The Engine Club team was fourth as Acacia could not get any horses and had to use pledges to pull their chariot. The remaining teams that entered in last year's competition, all tied for last place. These included Kappa Alpha, who broke a wheel on the way up to the golf course, the Tech Club, whose driver had food poisoning, and Pi Kappa Alpha, whose driver got his tux tail caught under the wheel, upsetting the chariot and causing it to smash into Triangle's entry, putting them out of competition also.

For all further information and instruction of the coming event, check the intramural board.

M. Club Announces Coveted Membership in Young Men's Jockey Ass.

The snapping of the "M" Club J. strap has focused the attention of this article on our illustrious jockey organization. The "M" Club or "gym dwellers" as they are sometimes called, clomp around our campus as if they were some sort of Greek God and are easy to spot since they wear the little yellow "M" twelve months out of the year.

There are many interesting things happening in the "M" Club these days. It has been reported that the group is trying to obtain membership in the YMJA, the Young Men's Jockey Association. If they succeed, the group will become the second largest group on our campus, second only to our courageous "campus commandos," the fearless members of the ROTC.

It is also understood that our boy Dooley Dogood, after this basketball season, has pulled out in front of Red Auerbach in the contest for "towel thrower of the year." Red hopes to regain his title in the finals of the NBA, but fears that our boy Dooley has

thrown far too many towels for him to catch Dogood this year.

Another interesting footnote is that the gym dwellers are supposedly raising some new type of athletic specie in the towers of the MSM gym. One "gym dweller" was overheard saying that the animal will make his debut wearing two "M's" on his jacket. The double "M" could stand for Mau Mau, so beware of the latest J. strap monster.

The school is developing a new course this semester, catalogued "P. E. 100.00 This course is designed to give the students a more advanced study in Physical Education. The material for study is a far more intellectual series of physical fitness films. The films will be moderated by one of the smoother-tongued members of the "M" Club.

The official organ of the "M" Club J. strap has nothing more to report on the happenings in Jackling Apartments, and so it wishes all the "gym dwellers" a ridiculous April Fool's Day.

Ye Ole Campus Organizations

By Mildred and Opie Poorpature

All Pledges Out

Alpha Phi Omega is an organization of old Boy Scouts. When a Scout reaches the age of reason he can no longer be a Scout, so he joins APO.

This organization is responsible for putting "Keep Off the Grass" signs in the middle of the best short-cuts on campus, supplying the Student Lounge with a television set which never works, and also for the broken ping pong paddles and balls in the lounge. Other well known activities of these former Boy Scouts and Brownies is helping old ladies across the street, and selling Girl Scout cookies.

As a matter of fact, the MSM Student Union Building is being built with the proceeds of cookies sold by members of APO.

Still another service of APO is to distribute desk blotters to the students free of charge. These desk blotters come in many ridiculously bright colors, which all have the tendency of destroying the eye-sight and cause headaches when used to cover a desk top.

The Student Lounge which is located in the basement of the Rolla Building is kept in shape by APO. They supply it with broken chairs, and copies of last year's magazines which APO members obtain from the local library.

One of the latest projects of Alpha Phi Omega is to encourage more participation in varsity sports, and greater school spirit among the students. It seems that a lot of potentially great "Jocks" do not even go out for the teams, and very few students go to watch the athletic events and cheer MSM on to victory. Coach Bullman has been known to say and we quote, "This is a good organization, and if they can help put the 'Jocks' on our varsity teams, I'm sure we will be able to hold our own in the conference. But remember students, if you aren't good enough to be a 'Jock', you can still be an athletic supporter."

fessors in their argument against drawing.

"Drawing has no practical applications," said an english diagramming expert. A T-square is useless as far as the diagramming of sentences is concerned. Drawing equipment sets are incomplete mainly because they do not include among their contents Jack Commas edition on punctuation. These are but a few of the significant gripes against engineering drawing.

The Constitutional revision also eliminates the use of the slide rule, the well known tool of every engineer. "But I can't work out word comparisons on this thing," yelled an English prof. in utter despair. "This machine doesn't even include a table of suffixes and prefixes" screamed another prof.

Down with the chemical and physical sciences. This was another big factor in the Constitutional revision. "Atoms, molecules, compounds, bah, all lies," remarks the humanities department. Forces, magnetism; how does this ridiculous junk apply to word structure and analysis? "How can I tell whether two syllables are covalent, electrovalent, or coordinate covalent?" raved a zealous English authority. What words are ions and which are not? Does the foolish equation "E equals MC squared" apply to the building of words and sentences? Could I travel back through time and rewrite a paragraph?

Two plus two gives one the sum of four; but, a noun plus a verb results in a transitive sentence. There is strictly no analogy whatsoever between English and engineering subjects. In fact, due to the humanity guns foolish constitutional revisions one will most probably be forced to figure up his budget grammatically and then diagram it in order to avoid the use of such silly methods as mathematics.

Rotten Sea Band

Few students here at the School of Mines realize that our school has several outstanding musical groups. The most infamous of these groups is the crack ROTC Band. This band is widely recognized as the only ROTC band in the entire northern half of Phelps County. Yes, its notoriety is very nearly county-wide, and justly so, because its accomplishments are many and varied.

The band was organized several years ago to provide music for the drills and ceremonies of the military department. However, since the band could only play waltzes and foxtrots, they were somewhat of a dismal failure in this roll. Visiting dignitaries have made several notable comments about the band, none of which are printable.

Undaunted by this failure, the group decided to perform at all home football games. Anyone who has seen them will agree that they put on quite a performance. Fortunately, space doesn't permit a complete description of the band's precision half-time drills. However, one of the highlights of these drills is when the band marches out from behind a gigantic moving representation of a "great white whale", with the brasses playing "Our Director", and the reed and percussion sections taking the chorus with a few quick licks of

"Rockin Robin". Spectacular to say the least.

Mud Runners

One might think that a group such as this would sort of "fade-away" when bad weather prevails. Far from it, they all descend into the basement of the Rolla Building once or twice a week and fill the air with what is sometimes laughingly referred to as "chamber music." Sometimes they even go so far as to insult the works of such famous composers as Bach, Hayden, and the ever popular Fred "Tubby Hall. Once a year the entire organization fights its way into Parker Hall, and presents a concert. Generally, half of the band is detached to form an audience.

Other functions of the band are: concerts at old peoples homes, prisons, and state mental hospitals; conning the Student Council out of money for new uniforms; and marching to and from the intramural field.

It might be noted, in closing, that while the ROTC Band seems to be rather incompetent, it actually does quite poorly. At this time it is the best, and of course

the worst, band at the Missouri School of Mines.

Cudent Stouncil

An emergency meeting of the student council was called by Dean Moldie at Bar-Track's last night. The object of the meeting was to comply with recommendations received by Dean Moldie from the Governor. The Governor, following the theory of modern education, encouraged the Dean to make changes in school policy which would result in a happier student body. The Governor contends that a happier student will make a better quality engineer.

Several proposals were enthusiastically made. The first was that clocks be installed in every hall and room, sundials which would glow in the dark placed on trees. Beer coolers would replace the present water fountains.

The Council was unanimously in favor of a complete female faculty. The Council itself would screen applicants for this new faculty. The Council voted to

establish a rating chart for these coed profs. They must be between the ages of 17 and 23, funloving, kindhearted, measurements of 37-19-34, familiar with popular indoor and outdoor sports (snicker)—oh, just Party Girls! This motion has met some opposition from the MSM coeds, but the Council feels that the immense enthusiasm for this proposal will carry it through.

School standards are to be lowered approximately 25 percent. Negative hours are to be replaced by positive hours, acquired for attending every Physics class. Cutting classes and sleeping in class should be brought to a minimum as a result of the female profs. All "guns" will be temporarily transferred to Cape to learn to party.

This secret meeting is a surprise move and its consequences are expected to be felt immediately.

Make Mine Flagstaff On Tap

New "post-grad" program helps engineers move ahead at Western Electric

MANHATTAN'S COLISEUM TOWER building houses Western Electric's New York training center. Here, as in Chicago and Winston-Salem, N. C., Western Electric engineers participate in a training program that closely resembles a university graduate school.

Careers get off to a fast start — and keep on growing — at Western Electric.

One big help is our new Graduate Engineering Training Program. This unique full-time, off-the-job study program starts soon after you join Western Electric... continues throughout your career. Students are offered courses in various fields including semiconductors, computers, feedback control systems, and problem solving techniques. What's more, they study methods for improving skills in communicating technical information and the art of getting ideas across.

You'll find the work at Western Electric stimulating, too. As manufacturing and supply unit of the Bell System, we pioneered in the production of the transistor, repeated submarine cable, and the provision of microwave telephone and television facilities spanning the country. Engineering skills can't help developing—careers can't help prospering—in the lively, exciting technical climate at Western Electric.

Western Electric technical fields include mechanical, electrical, chemical, civil and industrial engineering, plus the physical sciences. For more information pick up a copy of "Consider a Career at Western Electric" from your Placement Officer. Or write College Relations, Room 200E, Western Electric Company, 195 Broadway, New York 7, N. Y. And sign up for a W. E. interview when the Bell System Interviewing Team visits your campus.

Western Electric
MANUFACTURING AND SUPPLY UNIT OF THE BELL SYSTEM

Western Electric Graduate Engineering Training Centers located at Chicago, Ill.; Kearny, N. J.; Baltimore, Md.; Indianapolis, Ind.; Allentown and Laureldale, Pa.; Burlington, Greenboro and Winston-Salem, N. C.; Buffalo, N. Y.; North Andover, Mass.; Lincoln and Omaha, Neb.; Kansas City, Mo.; Columbus, Ohio; Oklahoma City, Okla.; Teletype Corporation, Chicago, Ill. and Little Rock, Ark. Also Western Electric Distribution Centers in 32 cities and installation headquarters in 16 cities. General headquarters: 195 Broadway, New York 7, New York.

CLASSROOM SESSION at one of the centers takes up the first part of the three-phase program, Introduction to Western Electric Engineering. During this initial nine-week training period, new engineers are provided with a better understanding of Western Electric engineering methods and technical practices.

TECHNICAL TALK often continues after class. The free and easy informality of the new Western Electric training program offers plenty of opportunity for the stimulating exchange of ideas.

Tau Beta Pi on Pro.; Pres. Local Beauty

Dean Moulder announced today that the entire Tau Beta Pi organization has been placed on scholastic probation. This move has been expected for some time, but it took a purge of the higher offices to bring it about.

President of Tau Beta Pi, Sidney Green, is going to register a complaint. It seems that Moulder is violating some sort of agreement between the faculty and Tau Beta Pi. Green will wait until after the next meeting, however, because many members of Tau Beta Pi feel that too many people are making high grades and they will be more elite as a scholastic pro club.

Since there are undoubtedly some of you who don't know what a Tau Beta Pi is, this brief description should help.

To begin with, Tau Beta is not an EE organization as many people believe. This idea started with the "we take care of our boys" policy used by two of the departments in Pigeon Nest Hall, namely EE and Grade Point (sometimes called Physics).

You can usually spot a Tau Beta. He is the fellow who sits on the front row of the class with brief case, hat, smile, Tau Beta Pi key, brown nose, G. I. check, pictures of his wife and children, horn-rimmed glasses, slide rule and long list of questions for the instructor. No one has yet figured out how they can be talking to the instructor when you leave class and still be sitting on the front row talking to the instructor when you get to the next class. They often wear a pin with their grade point on it.

When a Tau Beta Pi tells you what his grade point is you can believe him. He knows because they hold periodic meetings where the whole group gathers around Cochran, Poppitz and Green to calculate each other's grade point. Dr. Moulder has been watching Bear Track's closely and is sure that drinking hasn't caused them to go on pro. Really this could be a mistake, because a Tau Beta Pi isn't the kind of man who would go to a bar and drink beer. He stays home and boozes it up on cheap wine.

As the word spread around campus today new threats arose. Coach Bullman is afraid that none of the Jocks will be able to get on scholastic pro, so he is going to start giving nothing but A's ni

ROTC Shake-up

(Continued from Page 1)

holic conditions within the department and will attempt with all due Puritan judgment to wipe out all such vile influences. Quote, "In order to show who's boss around here, I, His Lordship, will do all the drinking around here."

The now liberal credit hours given for the few hours spent in ROTC will be curtailed. Hereafter, all basic courses will give one hour's credit for every three lovely hours spent in this pest-hole. For advanced guns, a p for 5 ratio has been adopted. The lone exception will be when Sogley teaches. His Lordship realizes Sug's extensive vocabulary including such grammatical gems as, "You won't do nothin', no time, no way, no how, Amen." For such an intellectual uplifting, as will be given by old Sug—no credit will be given. Everyone will come anyway, so why give credit.

New President

Physical Education class and keep everyone out of Tau Beta.

College Opens New Door; Time Limit Extended

Since the arrival of the new Dean of Women at Lin-did-would-U College for Women things have taken a change for the better. Carrie Nation the new dean announced last week that the girl attending the college will be allowed to stay out till 9:30 a night. On special occasions the new rule will be extended even further with the girls being allowed out an extra thirty minutes at ten o'clock to complete their engagements. This is a vast improvement over the old 8:30 dead line.

A number of other conveniences have been added by the new dean. A bar has been installed in the downstairs lounge to be used by the girls and their dates. This will expell the need for the girls keep their liquor locked in the rooms, also eliminating the rush to hide the drinks before the dorm mother checks the rooms for study hours said the new dean. Sunday afternoon will find a cocktail party taking place in the main lounge

from two to five with a special floor show put on by some of the more talented girls. Returning to

THE MISSOURI MINER

Page 7

New Student Union Building to House Many Miner Recreational Facilities

(Continued from Page 1)
form of a slide rule, complete with scales and hairline. This will enable Miners to work homework problems and study while taking advantage of this facility.

boys of the humanities department, there is one opening.

The student body has shown an amazing interest in the work and progress of the new addition. In a recent mass meeting of the

tion is in the process of hiring someone to run the details. If the contract with Emily Post falls through it has been said that the administration would like to obtain the services of Bridgette Bardot as Dean of the Student Union Building.

If the work progresses as rapidly as it has in the past few years, there is no doubt that most of us will see the completed Building. As we sit back, in our seventh or eighth attempt of our senior year here at MSM, and gaze out over the "Big Shaft" swimming pool in the basement to see the dressing rooms with their "Bell Telephone" signs hanging over the transparent, folding doors; we can turn to the freshman coed relaxing beside us, and say, "I was here when the Student Union Building was only a dream, and the Student Union Fee was only \$5.00. But, Hmmm-I still wonder Where did all my money go."

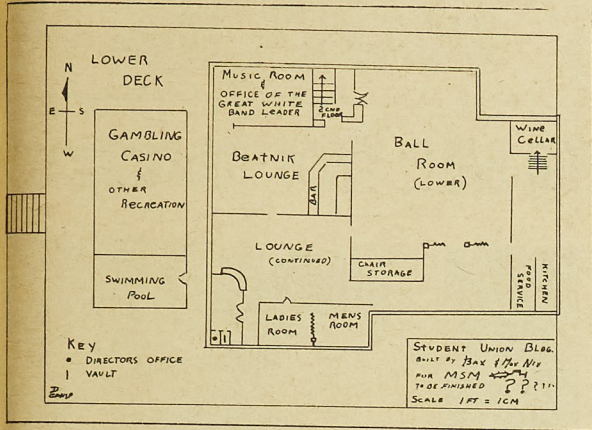

arms in the air, supposedly giving handsignals. The primary outcome is that many of the students will be convince of the value of being a bird—a useful part of unconcealed camouflage.

The night session will be led by that "mountain" of energy, Slobbins Blobbins in a suit of Lincoln green. He will be accompanied by his ready-teddy daddys, conservatively known as the MSM ROT-C Band. Students will be then treated to a special treat—Buck Cannon, the terror of the Odd West from Twenty Six Palms and Two Waterholes, Ariz. Valiantly, he will demonstrate the

value of economics as applied to fat band leaders.

His Lordship feels much is to be gained by this integrating of his German knowledge and ability with that of his American counterparts. He is a firm believer in the old theories, "Ride fast, your hair depends on it, since the Indians are coming" and "Two birds in the bushes, are better than just one in hand."

Grown men make their toughest decisions in the bathroom: when to discard a toothpaste tube, a worn toothbrush, a dull razor blade, and a sliver of soap.

The second floor will be taken up by the Stardust Ballroom. It will be used for the many school functions that go to make the School of Mines the number one party school in the nation. Any campus organization may rent the Ballroom for a night if they will guarantee that all of their members will attend everyone of their scheduled classes for two weeks.

The most amazing feature of the architecture of new building is the third floor. It will house bachelor penthouse apartments for some of the noted playboys in the faculty. These apartments have been filled for months in advance, but it is reported that due to the recent marriage of one of the noted play-

student body the proposal of the Flawstaff Brewing Corp. was voted down unanimously. They had proposed to construct the building free of charge if they could have the refreshment rights to the Bar and Grill. Instead of accepting this proposal, the student body voted to raise the Student Union fee from \$5 a semester to \$10. Another innovation will be the turnstiles that are to be installed. They will help pay for the building. Instead of paying to get in the student will have to pay to get out.

There has been no definite policies set up concerning the Student Union as of yet. It has been rumored that he administra-

ROTC Shake-up

(Continued from Page 1)

Another vast improvement is the adding of two-night double-headers in drill. The two-part will be led by none other than the redoubtable Ranger (not to be confused with Tonto's buddy) Hasscock. He will divide the time into two parts—killing and worse.

During the killing part—he will show blood-thirsty pictures of old grandmothers aiding the Gestapo and NKVD in action. The second stage contains a study of aerodynamics and camouflage. The students will in parade form, utter blood-curdling yells, and fan their

Do You Think for Yourself? (THIS SHORT QUIZ WILL TIP YOU OFF!*)

1. When your friends impart confidences, do you feel (A) uncomfortable, or (B) complimented? ☐ A ☐ B
2. Do you prefer a task which demands (A) the organization of complex details, or (B) a constant flow of ideas? ☐ A ☐ B
3. Would your first reaction to a difficult committee appointment be that you had been (A) "stuck," or (B) honored? ☐ A ☐ B
4. If you were a contestant on a quiz program which of these question categories would you prefer: (A) popular songs of today, or (B) current events? ☐ A ☐ B
5. Do you find that you work or study more effectively (A) under supervision, or (B) on your own schedule? ☐ A ☐ B
6. Is it your feeling that close friendships with superiors would be (A) a great help, or (B) actually a hindrance to your career with a firm? ☐ A ☐ B
7. Which, to your mind, has the greater influence on you in making a good grade: (A) the instructor, or (B) the subject matter of a course? ☐ A ☐ B
8. Do you believe that the saying "haste makes waste" is (A) always true, or (B) often false? ☐ A ☐ B

9. Which would weigh more heavily in your choice of filter cigarettes: (A) the opinions of friends with similar tastes, or (B) your own considered judgment? ☐ A ☐ B

It is usually the case that men and women who really think for themselves come around to VICEROY as their brand of filter cigarette . . . for two very good reasons: VICEROY is the one cigarette that gives them a thinking man's filter and a smoking man's taste.

*If you checked (B) on any six of the nine questions . . . you really think for yourself!

Familiar pack or crush-proof box.

The Man Who Thinks for Himself Knows —

ONLY VICEROY HAS A THINKING MAN'S FILTER . . . A SMOKING MAN'S TASTE!
